

Buvaneshwari Sriramulu
Indian Institute of Science
India

Buvaneshwari Sriramulu is a PhD student in the Department of Civil Engineering at Indian Institute of Science, Bangalore, India. Her research is focussed on understanding the fate of nitrogen in tropical agro systems at the soil-plant scale and catchment scale. She has gained extensive experience on agro-environmental monitoring, chemical analysis, water and nutrient cycle modelling. She is also actively involved in the activities of the Indo-French Cell for Water Sciences, especially in the research carried out in the Critical Zone Observatory (ORE BVET) developed in South Karnataka (Kabini Basin).
