

Carolina Gomes da Rocha
UNESP
Brazil

Carolina Gomes da Rocha received her Chemistry degree (2011) and a Master's degree in Chemistry (2014) from Universidade Estadual Paulista (UNESP) in Araraquara, São Paulo (Brazil). During her master's and undergraduate research worked in the development of electrochemical biosensors for detection of relevant substances in the environmental and health areas. Currently, is PhD student at the same university, in the Analytical Chemistry Department, and her research is focused in the study of reactive nitrogen compounds emissions to the atmosphere from the fertilizers used in sugarcane crops and their availability and impacts to the environment.
