**JENNIFER BOEHNERT**
**National Center for Atmospheric Research (NCAR)**
**USA**

Jennifer Boehnert is the GIS Coordinator for the National Center for Atmospheric Research (NCAR). She is actively involved in the integration of atmospheric and traditional GIS data for better understanding the impacts from climate change and extreme weather events. At NCAR, Jennifer is involved in a number of projects; from the analysis of future global heat waves, to the distribution of climate model output in a GIS format. Over the past few years, Jennifer has developed and taught a number of courses for workshops at NCAR in order to train participants on how to appropriately use GIS as a tool for answering spatial questions at a various of scales.
