KEVIN SAMPSON
National Center for Atmospheric Research (NCAR)
USA

Kevin Sampson is an Associate Scientist with NCAR's GIS Program. His background is in GIS and Remote Sensing, as well as Glaciology and high-latitude climatic change. He is interested in integrating GIS processes into NCAR science, as well as integrating climate and weather data into the realm of GIS applications. At NCAR, Kevin is involved with a number of projects involving drought, hydrological modelling, teaching GIS, and distributing climate model data through the GIS Climate Change Scenarios Portal.
