

BASTIÁN ALBERTO OÑATE POTTHOFF

**Corporación para la Conservación y Uso Sustentable de los bosques de Alerce
Chile**

I am Engineering on Conservation of Natural Resource, from Universidad Austral de Chile, graduated with distinction on November 2015. During my studies I conducted assistantships in five undergraduate courses and participated in two projects of environmental education as volunteer. I was involved in two scientific research projects; as operational support in a scientific experiment based on the application of aquaculture sludges in southern Chile soils; and as support crew and development of undergraduate thesis in a National Fund to understand the physiological mechanism in high elevation forests in sub-antarctic tree-line, finally I expose this issue in an international and national congress. Since I graduate, main professional experience has been as an Independent Environmental Consultant. First to develop a wildlife relations description and environmental management plan from two inland fish farms in central and south Chile. Then, I assumed a WWF Chile found (CPL \$ 8 millions) to characterize six priority aquatic ecosystems conservation goals the basin of Rio Valdivia. I currently serve as Executive Secretary of the Corporación para la Conservación y Uso Sustentable de los Bosques de Alerce, and Independent Environmental Consultant.
