

ISMENE ROSALES

**Universidad Nacional Autónoma de México
México**

Civil engineer with masters and doctorate in hydraulic engineering by the Universidad Nacional Autónoma de México (National Autonomous University of Mexico, UNAM), has worked for several years at the Instituto de Ingeniería (Institute of Engineering) of the UNAM, thus being linked with the research area. At the same time, she has developed projects in the private sector which have allowed her to enrich her perspective. She has been a professor at the UNAM, the Universidad Autónoma de Baja California (Autonomous University of Baja California) and the Universidad Veracruzana (University of Veracruz). She is now part of the Grupo de Tratamiento y Reúso (Treatment and Reuse Group) of the Instituto de Ingeniería of the UNAM, where she is developing a postdoc on "Effects of Climate Change in the Water Sector in terms of quantity and quality".
