

Thays Thyanne Luz Santos
Universidade Federal do Maranhão
Brazil

Thays Thyanne Luz Santos is currently a Master Degree's student in the Graduated Program in Oceanography (PPGOceano) with the research area in Coastal and Ocean Dynamics Systems at the Federal University of Maranhao (UFMA), supervised by the Professor Dr. Rozane V. Marins, where she is developing the Master's thesis about geochemical distribution of metals in the Estuarine Complex of Rio Mearim. She graduated in 2016 in Bachelor in Oceanography by UFMA. She was intern at Biogeo cycles and Water Components Lab, where she developed the capstone project entitled "Nutrients Dissolved Flow in Estuarine Complex of Rio Mearim, Maranhao", supervised by the Professor Dr. Samara A. Eschrique. She had the formation complemented by international exchange program in 2013, where she attended the School of Marine Science Program and the Intensive English Institute in University of Maine- Orono (ME), United States by Brazil Scientific Mobility Program - CAPES. She was intern at Marine microbial ecology lab in Dauphin Island Sea Lab- Alabama, United States by the Northern Gulf Institute program at the National Oceanic and Atmospheric Administration (NOAA), where she performed analysis and processing of physical, chemical and biological data of water, focusing on DNA sequences of bacteria from the Gulf of Mexico, supervised by the Professor Dr. Alice C. Ortmann.
