

**LENIN HENRIQUEZ DOLE**  
**Polytechnic University of Valencia**  
**Honduras**

Lenin Henríquez Dole is a researcher at the Polytechnic University of Valencia (UPV) in Spain. He has been involved in local and regional projects on water, education and science policy in several parts of the world (Jordan, Europe and Latin America) as UNESCO's Science Assistant. His main research topics/interests are the impact of climate change in water resources, with emphasis in land use change and aquifers; and hydrologic models. He is a civil engineer focused on hydrology and holds a Masters degree on Hydraulics and Environment with special approach on Water Resources Management. In a few months he will be starting his PhD on Water Resources Management in the Pontificia Universidad Católica de Chile where he will be studying the impacts of land use change in the Maipo's river basin.
