

ELMA MONTAÑA

CONICET (Scientific and Technological National Research Institute)

Argentina

Elma Montaña is a CONICET (Scientific and Technological National Research Institute) researcher at the Human, Social and Environmental Sciences Institute (INCIHUSA) and full professor of "Urban and Rural Sociology" at the School of Political Sciences of the National University of Cuyo, Mendoza, Argentina. She holds a PhD and a DEA from the Sorbonne University-Paris 3 in Geography and Planning. Working in the INCIHUSA-CONICET, she leads a research team working on space-society and nature-culture relations in drylands, political ecology of water and vulnerability to global environmental change. In the last three years she has been awarded the UDUAL (Latin American Universities Union) Research Award and the CLACSO "Superior" research fellowship to address climate change human dimension's issues for study cases in countries of Latin America. She is currently leading the Argentinean team of the "Vulnerability to Climate Extremes in the Americas" project and is working on climate change and food security issues for Latin America, African and Asian cases under the Africa/Asia/Latin America scholarly collaborative program of APISA – CLACSO – CODESRIA.
