

**KERSTIN KRELLENBERG**

**Centro Helmholtz de Investigación Medioambiental  
Germany**

Kerstin Krellenberg is an Environmental Scientist, holding since 2007 a PhD in Physical Geography from the Humboldt Universität zu Berlin in Germany. Since 2007 she is working at the Helmholtz Centre for Environmental Research – UFZ in Leipzig (Germany) where she is conducting research on megacities, urban risks and vulnerabilities, and urban climate change adaptation. Her special research interest lies on cities and adaptation to climate change. Currently, she is coordinating a science-policy interface project on climate change adaptation in Santiago de Chile, including other large Latin American cities for mutual learning on climate change adaptation strategies. Her work involves the steering of the processes of the different scientific and practical activities, like a strong participation of local stakeholders that the development of concrete adaptation measures comprises. Within the last 10 years she has been working in different research projects on megacities in Latin America.
