

MÁRIO MARCOS DO ESPÍRITO SANTO
Universidade Estadual de Montes Claros
Brazil

Mário Marcos do Espírito Santo received his PhD in Ecology, Conservation and Management of Wildlife in Federal University of Minas Gerais, Brazil. He currently works as a professor at the State University of Montes Claros, in Minas Gerais state, Brazil, where he coordinates the local activities of the Tropi-Dry Collaborative Research Network. His main research interests include ecosystem functioning and the natural regeneration of tropical dry forests, with focus in plant-animal interactions; land use changes and their consequences for biodiversity and human welfare; and conservation and development policies for tropical dry forests in Brazil.
