

YUMI OKI

University of Minas Gerais (UFMG)

Brazil

I am biologist, Master and PhD in Science, and pos doctorate student in ecosystem services. My expertise areas are ecosystem ecology, applied ecology, biodiversity, restoration and ecosystem services. Currently I am analyzing the ecosystem services provided by areas of different land uses and the perceptions of these services by population. The aim of my research is to integrate ecological, social and economic approaches to contribute advances policy targets and conservation strategies in areas of ecological relevance.
