

MONTSERRAT ACOSTA MOREL

The Nature Conservancy

Dominican Republic

Dr. Montserrat Acosta Morel is The Nature Conservancy's Climate Change Adaptation Specialist in USAID/TNC's Environmental Protection Program in the Dominican Republic. She obtained her Ph.D. and Master's in Science at Ohio State University in Agricultural, Environmental and Development Economics, with a speciality in Environmental Economics and Climate Change. Currently, she is working on evaluating and implementing climate change adaptation strategies (specifically ecosystem-based adaptation) in the D.R. together with local public and private institutions. Under this line of work, Dr. Acosta has overseen a national-level climate change perception survey, a vulnerability assessment, and the identification of climate change adaptation strategies in the Dominican Republic.
