

KATHLEEN E. HALVORSEN
Michigan Technological University
USA

Kathy Halvorsen is a professor of natural resource policy at Michigan Technological University in Houghton, USA. She has done research on water, land use, public health, climate change, biodiversity, and energy issues. Kathy has extensive experience leading and participating in international, transdisciplinary teams, especially within North and South America. She leads a 100 member transdisciplinary scientific team from Brazil, Canada, Mexico, Uruguay, Argentina, and the United States studying the socioecological impacts of forest-related bioenergy development. Her teaching includes international classes on interdisciplinary teamwork skills. She has published multiple articles on developing successful international, transdisciplinary scientific teams. Kathy particularly enjoys working with new groups and colleagues from Latin America.
