

**David Mawolo Mulbah Jr.**  
**University of Nairobi**  
**Kenya**

I am David Mawolo, Mulbah Jr, a Ph.D. climate change and Adaptation student in the Institute for climate change and adaptation at the University of Nairobi. I hold a Bachelor of Science (B. Sc) in Biology and a Master of Science in Climate Change. My career goal is to contribute to human resource capacity building and environmental sustainability through field research, training, lectures, seminars among others. I have strong knowledge about climate change mitigation and adaptation and biodiversity conservation. Over the last several years, I have worked with small-scale farmers and forest community dwellers to adapt to and mitigate climate change impacts using ecosystem-based approaches and climate-smart practices. My research interest is in the use of ecosystem-based adaptation approaches (ecosystem services) to adapt and mitigate climate change impacts in the agriculture sector.
