

**Eduardo Manuel Aguilera Fernández**  
**Universidad Pablo de Olavide**  
**Spain**

Eduardo Aguilera is a biologist conducting a PhD at the Agro-Ecosystems History Laboratory at University Pablo de Olavide (Sevilla, Spain). He is working at the project "Sustainable Farm Systems" in which he is involved in the study of the long-term metabolism of Spanish agriculture, including mass, energy, nutrients and greenhouse gas emission balances. His PhD dissertation deals with greenhouse gas emissions from Mediterranean cropping systems. He participates in the Scientific Network on GHG mitigation from the agroforestry sector in Spain (REMEDIA) and the Round Table on Organic Agriculture and Climate Change (RTOACC)
