

Gabriela Garcia Medeiros
Centre for Nuclear Energy in Agriculture (CENA) / USP
Brazil

My name is Gabriela Garcia Medeiros, I did Biology in my under graduation in University of São Paulo and I did an internship in Isotopic Ecology laboratory during 3 year, focused in maintenance of biogeochemistry fluxes in agriculture or polluted environments. Now I am doing my master in the same office, supervised by Professor Luiz Antonio Martinelli and I am studying changes in decomposition and nutrient cycling caused by biodiversity lost, in Atlantic forest.
