

Haiany Cristina Ribeiro de Miranda
Federal University of Tocantins
Brazil

I am an undergraduate student in environmental engineering course at the Federal University of Tocantins, I will finish the undergraduate degree in July 2016. I have experience with herpetofauna, and volunteer Research Group Chelonia and Crocodylians of the North Region. I was a scholarship by the National Council for Scientific and Technological Development, years 2012-2013 and 2013-2014, with studies on isotope ecology of carbon and nitrogen. My monograph entitled: "Study of the trophic ecology of *Leptodactylus latrans* through stable carbon isotopes ($\delta^{13}\text{C}$) and nitrogen ($\delta^{15}\text{N}$) in the plain of the Araguaia River, in Tocantins State", will be presented in early July 2016. I have experience in consulting (company LEME Engineering) and sanitation, realized stage on Effluent Laboratory of Environmental Odebrecht (2014-2015) Palmas-TO. I was a scholarship of Technological Initiation and Industrial Wastes in the Laboratory of Solid UFT (2015-2016). I am interested in the areas of environment, bioenergy, nitrogen cycle and agriculture.
