

Michelle Yeelin Wong
Cornell University
USA

Michelle is a 4th year PhD student studying Ecology and Evolutionary Biology at Cornell University. She received her bachelor degrees in Sociology and Molecular Environmental Biology from UC Berkeley in 2010. At Cornell, she is working with scientists from the Woods Hole Research Center and Marine Biological Laboratory to study biogeochemistry in the southeastern Amazon. For her dissertation, she is looking at the controls of phosphorus and molybdenum on nitrogen fixation at Tanguro Ranch in the state of Mato Grosso.
