

ELVIN DELGADO

Central Washington University

USA

Prof. Delgado is Assistant Professor of Geography, and Associate Member of the Graduate Faculty in the Resource Management Program at Central Washington University, where he also directs the Energy Studies Minor. His teaching and research interests lie in the areas of energy (both traditional and alternative), political ecology, political economy and nature, and critical resources geography. Dr. Delgado's research critically explores changing patterns of human-environment interactions in the context of fossil fuel production. Empirically, his research analyzes processes of socio-political struggles over resource development, the multi-scalar interconnections of the material flows of natural resources, and the socio-ecological transformations associated with resource extraction industries in sensitive aquatic ecosystems. His regional specialization is Latin America with over ten years of research experience in Venezuela. Dr. Delgado holds a Ph.D. in Geography from Syracuse University (USA), an M.S. in Geography from The University of Akron, Ohio (USA) and a B.S. in Geography from the University of Puerto Rico.
