

**LAUREN HERWEHE**  
**University of Arizona**  
**USA**

Lauren Herwehe is an M.A. candidate in Geography at the University of Arizona. Her thesis research is at the intersection of irrigation water management and drought vulnerability in semi-arid northeastern Brazil. This project is part of a broader research and decision-making initiative funded by the Inter-American Institute for Global Change Research (IAI) that links partners throughout North and South America. Prior to this Lauren researched irrigation water management in Tajikistan with a Fulbright grant, worked as a Geoscience and Public Policy Intern at the American Geosciences Institute (AGI), and researched climate change in Kiel, Germany with a grant from the German academic exchange program (DAAD). She holds a B.S. in Geosciences and B.A. in Geography from Penn State University. Her graduate studies are funded by a Foreign Language and Area Studies (FLAS) Fellowship for Portuguese.
