

PILAR ROMAN

Food and Agriculture Organization (FAO)

Chile

I am an agricultural engineer, MSc in Soil Science. Prior joining FAO in 2012, I gained international experience in wastewater treatment (Guatemala) and organic waste treatment and soil fertility (United Kingdom). In FAO I am based in the Regional Office for Latin America and the Caribbean, in Santiago de Chile. My work focuses on sustainable management of soil resources focusing on mitigation and adaptation to the Climate Change.
