

RODRIGO FUSTER
University of Chile
Chile

Rodrigo Fuster is Assistant Professor in the Department of Environmental Sciences and Renewable Natural Resources at the University of Chile, where he also directs the Diploma in "Water management and environment in the XXI century". Fuster teaches on Hydrology and Integrated Water Resources Management, and research on regional aspects of water management and use taking a complex systems approach. He is an Agronomist, Master in Environmental Science and a Ph.D. candidate at the Autonomous University of Barcelona. As a teacher he has directed several undergraduate and graduate theses. His work has focused interest in understanding the territorial conflicts associated with water and the development of tools to support decision making under the institutional framework of the Chilean model of water management, conducting research in different basins throughout Chile.
