

IGNACIO LORENZO ARANA

**Ministerio de Vivienda, Ordenamiento Territorial y Medio Ambiente
Uruguay**

Ignacio is 29 years old and lives in Montevideo, Uruguay. He serves as Project Coordinator for Institutional Strengthening of the National Climate Change Response System. He also advises the ViceMinister of Housing, Territorial Planning and Environment on issues regarding Climate Change, Environment and Sustainable Development.

Ignacio works as Assistant Professor in Urban Economics at Universidad de la República and as lead researcher in urban land taxation at the Institute for Urban Theory. He has served as Adaptation Advisor in the UNDP Territorial Approach to Climate Change Project for the Metropolitan Region of Uruguay, and as Adaptation Expert Consultant for CAF's Valle del Lunarejo Protected Area Climate Adaptation Project, he has also served as the IADB Expert Consultant for the drafting of IADB first National Climate Change Action Plan.

Ignacio studied Architecture at Universidad de la República, and has studied urban planning and urban landscape in Universidad Federal de Paraná in Curitiba, and Urban Planning for Asia-Pacific Metropolis at Master's degree level at the Ecole d'Architecture de Paris-La Villette. Ignacio has been named Climate Champion 2010 and Green Ambassador 2012 by the British Council. Ignacio is currently co-PI at the IAI funded project "Transferring climate knowledge in the science-policy interface for adaptation to drought in Uruguay", he has also assisted IAI and ECLAC on issues regarding urban adaptation for the publication "Urban Responses to Climate Change in Latin America".
