MICHELLE FARFÁN GUTIÉRREZ
Centro de Investigaciones en Geografía Ambiental
Universidad Nacional Autonoma de Mexico
Mexico

Michelle Farfán Gutierrez is a biologist graduated with honors from Universidad Autónoma Metropolitana (Mexico City). She earned a M.Sc. in Geography from UNAM (2009) with a thesis about deforestation in Mexico which was awarded as best thesis. She has continued her academic training as a Ph.D. candidate in Geography at the Centre for Research in Centro de Investigaciones en Geografía Ambiental (CIGA), UNAM, Campus Morelia, México. Her research focuses on the implementation and development of land use/cover change models in conjunction with the impact of deforestation processes on the distribution of biodiversity. As an important part of her formation are two short periods of international research at the Utrecht University (2011) and Universidade Federal de Minas Gerais (2012). She has also participated in six national and three international conferences and has three publications in journals of geographic information system. Finally, she has given specialized courses using DINAMICA EGO software at different universities of Mexico.
