

Priscila Moraes dos Santos
National Institute For Amazonian Research
Brazil

Graduated in Chemistry and MSc in Organic Chemistry by UFAM (Universidade Federal do Amazonas). For the final course assignment, I worked with atmospheric chemistry by analyzing the Ozone levels of UFAM main campus. My MSc dissertation dealt with phytochemistry of Amazonian species (genus Bauhinia) using chromatography techniques. Currently, I am working with Carbon and Nitrogen analysis of samples of soil, leaves and others tissues using CHNS-O equipment. My main interest areas are: N, C and water cycling in Amazonia and sustainable use of natural products.
