

Dr. Vincent Eschenbrenner

Dr. Vincent Eschenbrenner is a Research Director at the IRD (Institut de Recherche pour le Développement, ex ORSTOM), Montpellier, France, where he performs research in soil science and global change. He received a Doctorat es Sciences from Burgundy University at Dijon, 1987.

He is involved in the SeqC (Carbon sequestration in tropical soils) research unit since 1999. He has been working in Ivory Coast, Bolivia, West Indies, Brazil and France.

Dr. Eschenbrenner actual activity is related to international aspects of global change (Clean Development Mechanism of the Kyoto Protocol).
