

About my Work

“My research and public service focuses on coupled human/natural systems science, and the application of this science to sustainability, environmental policy, and humanitarian concerns. I have found the politics of science to be complex and important. The lessons learned working as Science Advisor in Washington, DC during the Obama administration closely reflect the IAI seminar's goals and themes.”

Haiti, post-earthquake, 2010

Acadia National Park, 2014

Deepwater Horizon Oil Spill, 2010

Dr. Gary Machlis

Clemson University Professor of Environmental Sustainability *and*
Science Advisor to the Director, US National Park Service

- **Discipline and areas of expertise:**

Human ecology, sustainability, conservation and science policy

- **Current Projects/Issues:**

Coupled human/natural systems science, conservation and science policy, scientific assessments during major environmental crises, sustainability for the forgotten (with N. Krogman), sustainability science and education in higher education (with N. Krogman)

- **Areas of interest for future projects:**

Caribbean-US scientific collaboration, social coping behaviors (with N. Krogman), disaster research, politics of science
