Environmental Management and Audit, MEM

Environmental Policies and Management, B.A

Specialization in Application of Renewable Energy

Specialization in Environmental Education

My works has developed between the protected areas and climate change sectors. I have work in the management of **Natural Protected Areas** where I mainly contributed to the revising *legal frameworks & mngmt plans* . Now, in climate change I work creating and revising **national legislation**, proposing mitigation measures, renewable energies and adaptation. Developing a **GHG Inventories** Manual and national GHG Inventory System

Professor: *Environmental Legislation*

- Sustainability
- Urban Planning and Climate Change**
- Sustainable cities
- GHG Measurements, (public transportation)**
- Environmental Tax
- Mitigation**
- Climate Change Policies
- Climate Change and Natural Resources**

Climate Change & Youth Network

Expertise: Env. Legislation- Env. Policies
Cimate Change-Protected Areas
Env. Education
