

About my Work

“My research focuses on the bridging of social justice with sustainable environmental management. For the past 20 years, areas of environmental management in my research have included Western consumption practices, wetlands, oil and gas, forestry, and agricultural practices. My public service focuses on shifting my University professoriate to a philosophy of mentorship for graduate students instead of supervision alone.”

Research in India on Food Security

Co-leading workshop in Haiti on the future of sustainability sciences

Director of Sustainability Scholarship and Education at UA for 4 years

Dr. Naomi Krogman

Professor of Environmental Sociology and Associate Dean of the Faculty of Graduate Studies

- **Discipline and areas of expertise:**

Social practices in higher education to promote sustainability content and scholarship, sustainable development, sustainable consumption, environmental policy implementation, integrated resource management.

- **Current Projects/Issues:**

Sustainability for the forgotten (with G. Machlis), sustainability science and education in higher education (with G. Machlis)

- **Areas of interest for future projects:**

Social coping behaviors for marginalized groups (with G. Machlis), graduate education that focuses on the public good and the nature of mentorship in the academy (with L. Foote).
