

# PDS on Transdisciplinary Approaches to Integrating Policy and Science for Sustainability

28 November – 02 December, 2016 – Puerto Plata, Dominican Republic

Natalia Zaldúa  
nataliazaldúa@gmail.com

**Institution:** I work for the Ministry of Environment - UN Environment

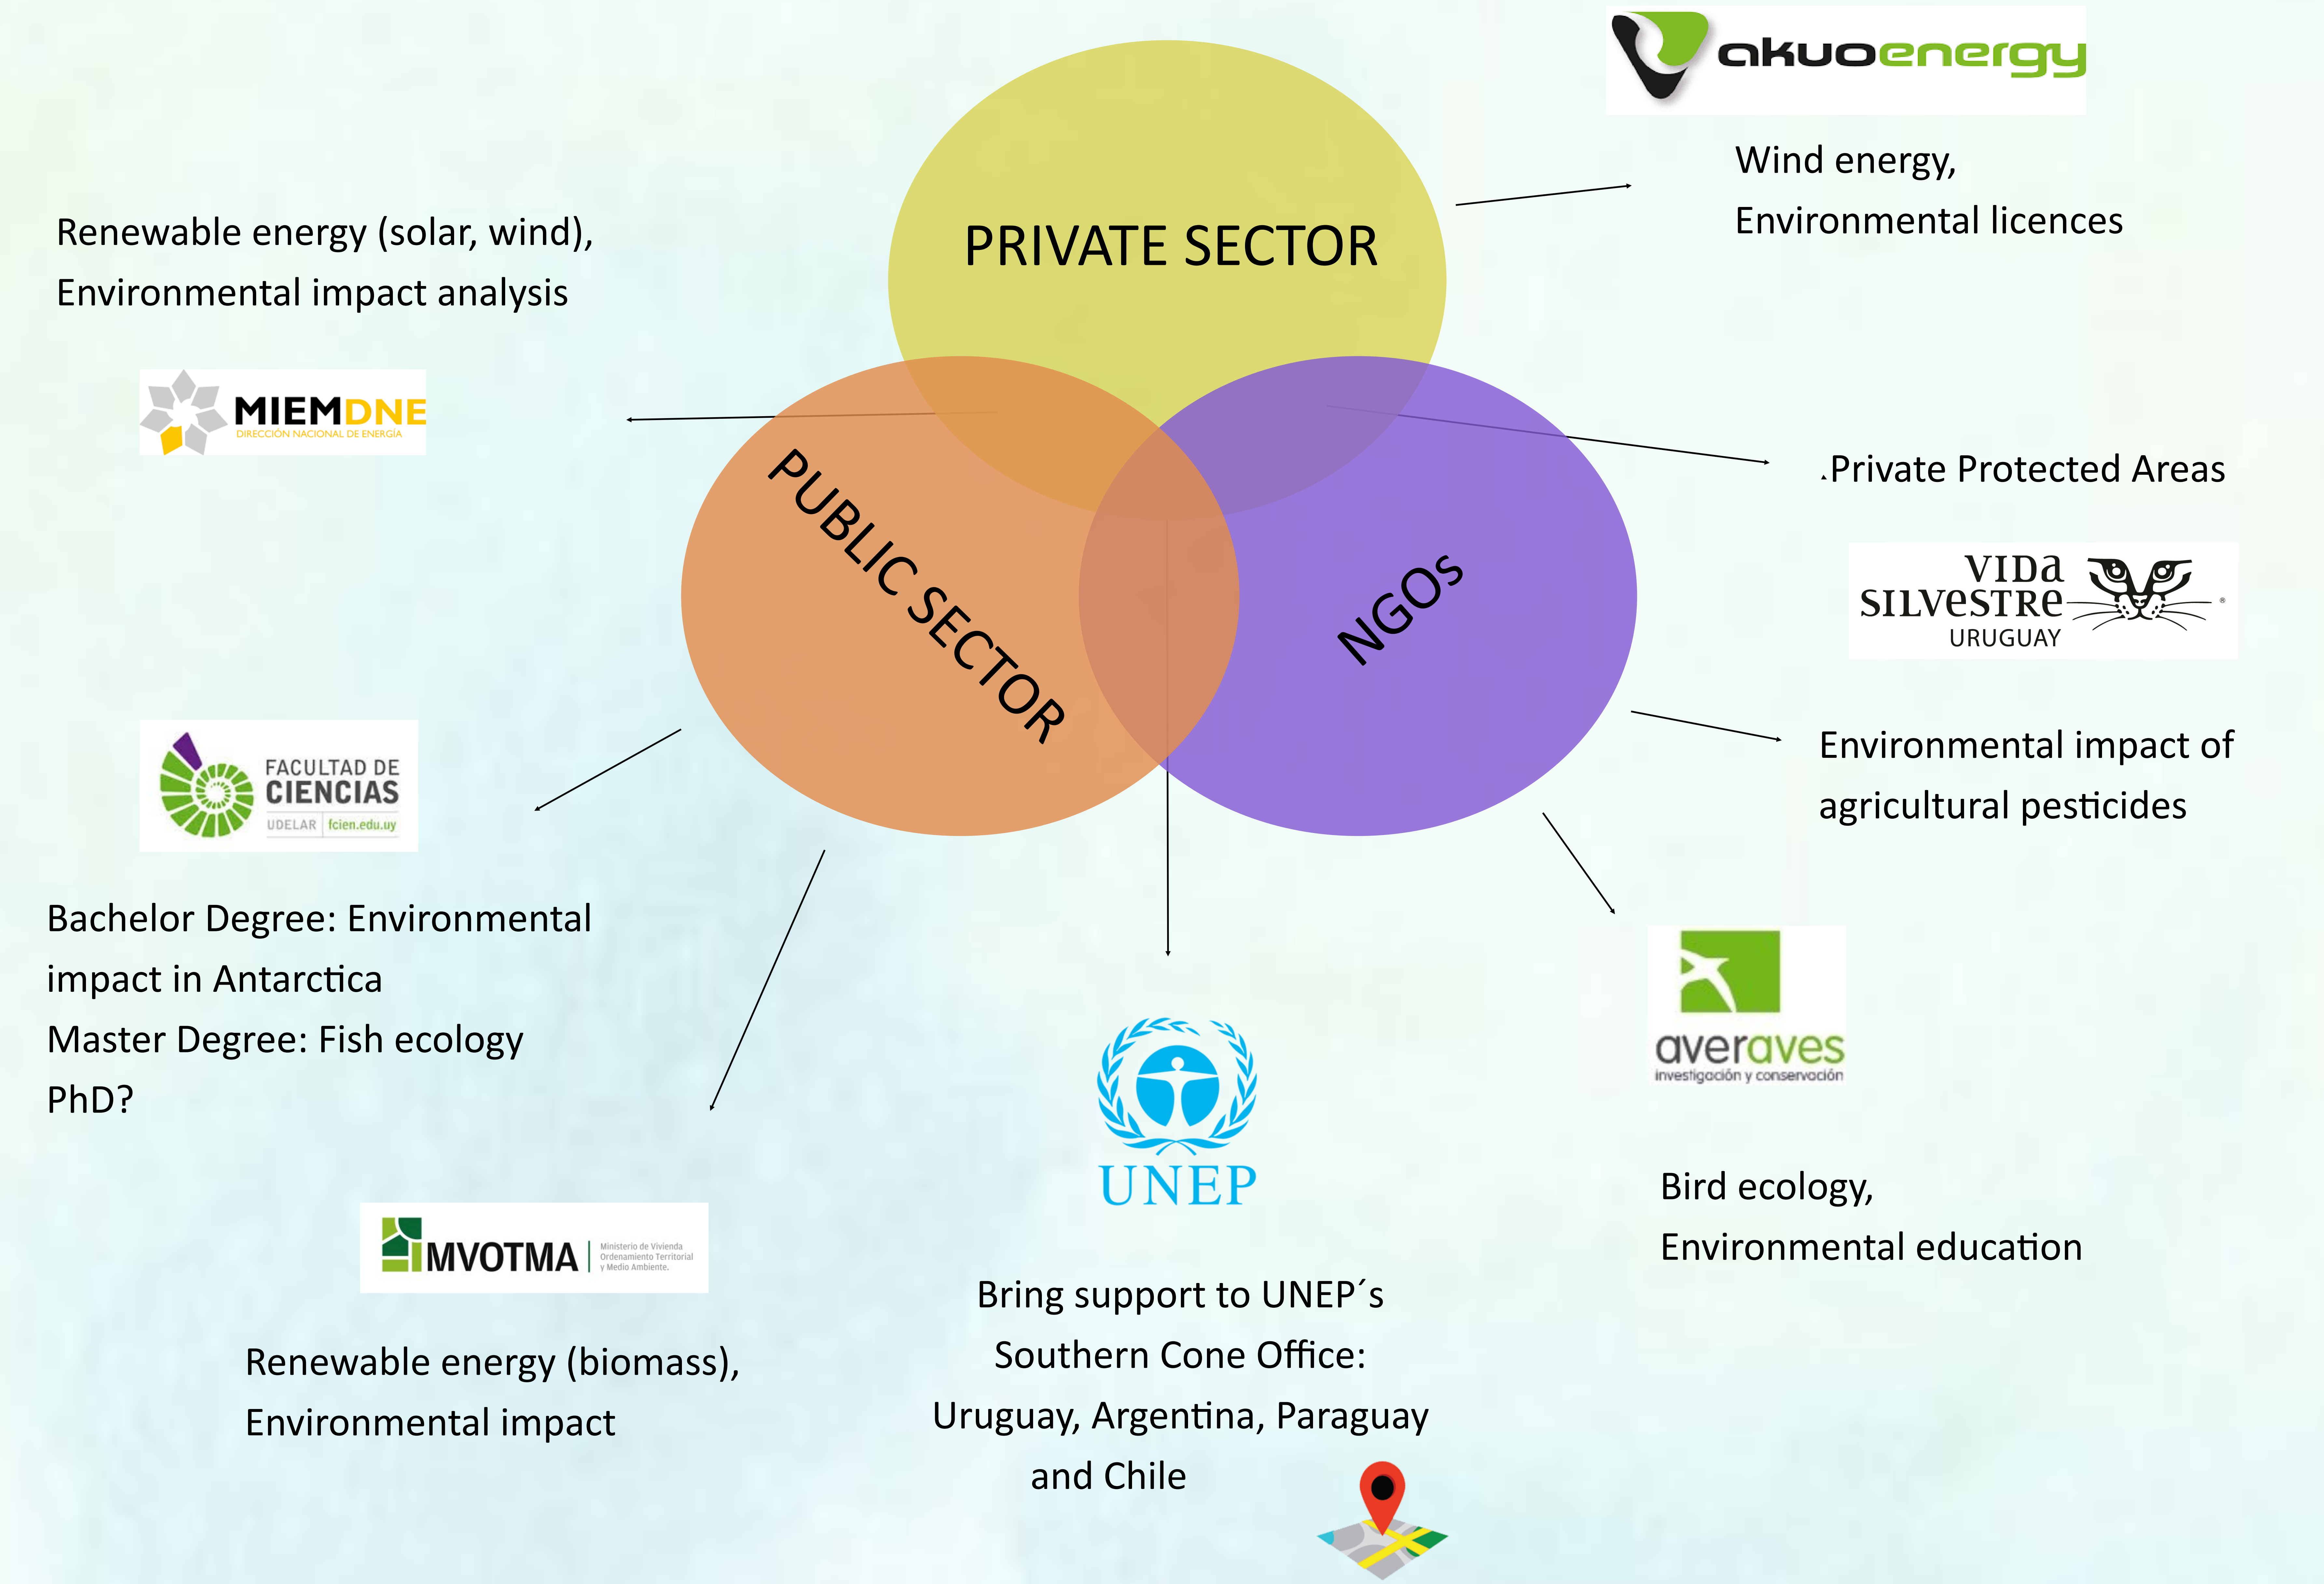

**Discipline of expertise:** Ecology, conservation management

**Sector:** UNEP is a UN Programme (intergovernmental organization); member of NGO Vida Silvestre Uruguay

**Issues currently working on:** identification and analysis of sub-regional environmental priorities, activities to promote biodiversity conservation

**Areas of interest for future projects:** land use conflicts, assessment of environmental and human health impacts

## MY BACKGROUND

Leaving no one behind

As UNEP works in the science-policy interface and with multiple disciplines, strengthening institutions for the wise management of the environment, the Professional Development Seminar will provide new insights and tools, relevant for empowering actions in the Southern Cone.

Being trained in Life Sciences and interested in land use environmental conflicts and assessment of environmental/human health impacts, managing transdisciplinary approaches will be an asset for my profesional performance.
