

JUAN ANTONIO RIVERA

**Consejo Nacional de Investigaciones Científicas y Tecnológicas
Argentina**

Juan Rivera received a M.Sc. in Atmospheric Sciences from the University of Buenos Aires, Argentina. He is currently involved in a Doctoral research at the same institute in Buenos Aires, with a scholarship from the National Scientific Research Council (CONICET). The main objective of his research is to improve the knowledge of the spatial and temporal variability of the occurrence of meteorological and hydrological drought events in Southern South America and to investigate the physical processes involved in them.
