

**MANUEL DOMÍNGUEZ PEREIRA**  
**Junta de Vigilancia del Rio Elqui**  
**Chile**

Civil Engineer with 12 years experience in development programs and projects related to management improvement and infrastructure associated with water resources in the basin of the Elqui Valley. To do this I have gained knowledge of the current water management in Chile that covers topics ranging from the legal, institutional, infrastructure and applications specifically targeted to irrigation and drinking water. In addition, I participated with a multidisciplinary team with the goal of generating educational activities in communities linked to water management Elqui Basin. I currently serve as General Dealer Water Monitoring Board Elqui River, whose main function is to ensure proper distribution of the surface rights of the Elqui River Basin and its tributaries, it also ensure the proper administration of the human and financial resources for the operation of the organization.
