

PEDRO PABLO SANZANA CUEVAS

CEAZA - Center for Advanced Studies in Arid Zones

Chile

Researcher at CEAZA (Center for Advanced Studies in Arid Zones), La Serena, Chile. It is necessary to preserve and use in a correct way the water resources in a semi-arid region, especially for the importance to the developing and sustainability of the several activities in the North of Chile. So, the main objective of my participation in this center is to get strong links with community and water users.
