

Federico Bert

Federico Bert is agronomist (University of Buenos Aires, 2002) and PhD in Agricultural Sciences (University of Buenos Aires, 2007). Currently, Federico is Assistant Researcher at CONICET (the research council of Argentina), assistant Assistant Researcher at the Research and Development Area of AACREA (Asociación Argentina de Consorcios Regionales de Experimentación Agrícola) a farmer-run non-profit organization. Federico's research interests are focused on the complex interactions between climate, water, and decision-making in agricultural systems of the Argentine Pampas. His PhD focused on the assessment of opportunities and limitations for the use of climate information in agricultural decision making. During last years, Federico coordinated the development of an agent based model of the agricultural production of the Pampas aimed to understand recent land use and structural changes in the Argentinean agricultural systems.
