

María Isabel Travasso

María Isabel Travasso is research scientist at the National Institute of Agricultural Technology (INTA) in Argentina. In 1976 she graduates as Agricultural Engineer, in 1986 obtains the Diplôme d'Etudes Approfondies (D.E.A.) and in 1990 the degree of Docteur en Science from the University of Paris XI, France. Her main research areas have been Agricultural Meteorology, Crop Physiology and Crop Modelling and, during the last 15 years her work has been focused on the assessment of climatic variability/climate change impacts and adaptation options in the agricultural sector. She led/co-led several national and international research projects, and has participated in the 1st and 2nd National Communications on Climate Change to the UNFCCC. She has been involved in IPCC activities as Contributing Author in the 4th assessment, and currently as Lead Author of the WGII in the 5th Assessment Report.
