

Alma Hernández Mondragón
Mexico

Dr. Alma Hernández Mondragón, hailing from Mexico, is a versatile scientist with a background in Pharmaceutical Chemistry, holding a Doctorate in Scientific and Technological Development for Society and a Master's in Neuropharmacology and Experimental Therapeutics. Her unwavering passion lies in the science-policy interfaces, aiming to bridge the gap between research and policy. With a rich career spanning academia, the local executive government of Mexico City, and the federal legislative branch, she excels in designing courses on government scientific advisory and scientific diplomacy. Notably, she has served as Coordinator of Advisors in the Science and Technology Commission of the Mexican Chamber of Deputies and as Director of Science, Centers, and Knowledge Transfer at the Secretariat of Education, Science, Technology, and Innovation of Mexico City. As a founding member of the Mexican Association for the Advancement of Science (AMEXAC) and a Global Young Academy (GYA) member, she stands as a dedicated advocate for informed, evidence-informed governance.
