Ministry of Science, Technology and Innovation
Brazil

Professional Experience

Graduated in Physics with a Master of Science in Meteorology and a doctorate in Meteorology. Has experience on researches about dynamic of atmosphere and numerical prediction of weather and climate. Working at Ministry of Science, Technology and Innovation has supported the proposing and the implementation of Policies and Programs for Meteorology, Climatology and Climate Change sectors. Currently, is Coordinator for Global Environmental Changes leading activities related to development of an information system to enhance the transparency of Brazil under the Paris Agreement of UN Climate Convention (UNFCCC).

Education

Doctorate in Meteorology – National Institute for Space Research (INPE) – Brazil – 2008.
Master of Science in Meteorology – National Institute for Space Research (INPE) – Brazil – 1999.
Graduation in Physics – São Paulo State University (UNESP) – Brazil – 1995.

Scientific Diplomacy

I was part of the Brazilian delegation in three COPs of the UN Climate Convention (UNFCCC), offering input for Brazilian delegates negotiate the conditions for implementing multilateral agreements on climate change. I am very interested in acquiring knowledge about scientific diplomacy to apply to the activities carried out in my work and I believe that attend this event will provide good tools so that scientific knowledge can be effectively used to support public policies.
