

Pedro Coss Sanz
Dominican Republic

Pedro Coss Sanz is an ecologist and environmental manager from the Dominican Republic. Mr. Coss has a double Master of Science in Environmental Agrobiology and he has participated on an academic exchange program on Environmental Sciences. In addition, he has multiple courses and certificates in monitoring and evaluation, climate negotiation, human rights, gender and knowledge management.

He's an advocate working in favor of vulnerable groups, trying to help to close existing gaps, reducing exclusion and vulnerabilities. An example of this, was his role as the specialist in charge of the inclusion of the cross-cutting issues of Climate Action and Action for Climate Empowerment in the update and review process of the Nationally Determined Contribution of the Dominican Republic in 2020. Currently, he serves the Dominican Delegation at the United Nations Framework Convention on Climate Change events negotiating and following on gender and action for climate empowerment.

Pedro currently works as a consultant and advisor on climate change, ecology and social empowerment. Also, he has worked as an environmental analyst, climate change adaptation analyst, educator and facilitator. It's important to mention, that as facilitator he has lead students of different capacity building efforts on science diplomacy specially on gender, human rights, capacity building and action for climate empowerment.
